

The built in reservoir gives us confidence to accept more jobs

Jo-Mi Plumbing and Solar, Inc.
Plumbing Specialists
W. Los Angeles, CA
8-Unit Condominium Complex
Recirc System
16 bedrooms total
20 bathrooms total
8 dishwashers
8 washing machines
2- Eternal hybrid GU32's

"On this Condo project the HOA knew their 100 gallon, 199,000 BTU water heater was on the way out so they pro-actively replaced the tank before it leaked from 4 floors up. They also wanted better performance, lower energy bills and a long warranty so we installed 2 Eternal units in parallel which works great."

"At Jo-Mi Plumbing we specialize in high efficiency equipment and unique installations. What attracted us to Eternal Hybrid was the built-in reservoir designed to recirc. without affecting the warranty. That Eternal feature removed a lot of limitations we experienced with other systems and gives us the confidence to accept more jobs."
