

California green remodel featured on Discovery Home Network

Homeowner
Costa Mesa, CA
Recirc System
3 Motion Sensors
Outdoor installation
1- Eternal hybrid GU32

"My family and I are motivated by water conservation, energy efficiency and just about anything else that's green today. That's when we learned about Eternal Hybrid."

"Our Plumber installed Eternal with a system that conserves water by supplying instant hot water to all the fixtures in our home. The pump is activated by three motion sensors located in each bathroom and our kitchen and when activated, the pump moves hot water to the fixtures in seconds. This system responds to us, which is the ultimate convenience."

"It's a brilliant setup and we were able to reduce our water usage 40-60%."
